

DiabeEase

BY : Team Bsisa

The prevalence of DIABETES

+ 251 million in 25 years

1 in 10 adults worldwide have diabetes

1 in 2 diabetic adults are undiagnosed (approximately 266 million people)

Diabetes by age (20-79 years)

532 million worldwide in 2021

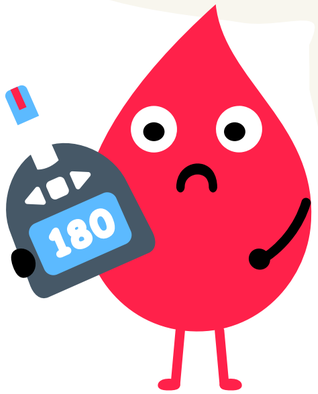

783 million worldwide in 2045

Problematic
(patients)

- Risk of blood sugar spikes
- A daily life punctuated by multiple injections
- Delaying or forgetting the insulin injection
- Scattered and unusable medical records
- Inadequate health advice
- Constant food confusion

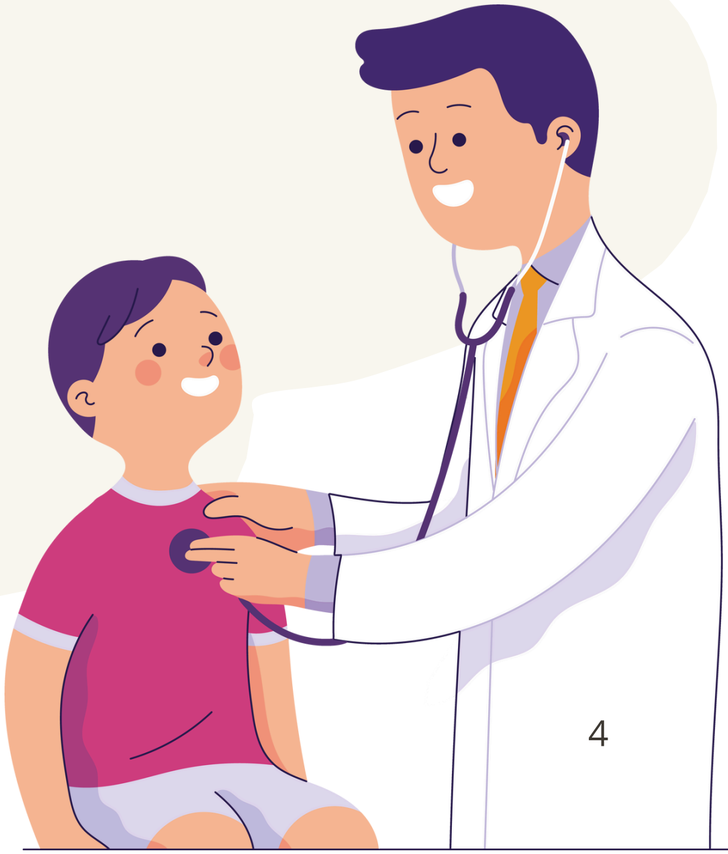

Problematic

(Doctors)

- Time wasted with new patients
- Lack of tools for remote tracking
- Disjointed medical follow-up

- Lack of visibility for new practitioners
